

ON-CALL TRAFFIC MANAGEMENT CENTER OPERATIONS TECHNICIAN

Location

Allentown, PA

About Drive

Drive Engineering is a leading DBE/MBE provider of Intelligent Transportation Systems (ITS), Traffic Engineering, and Transportation Planning and Engineering consulting services in the Mid-Atlantic region.

Job Description

This ON-CALL consultant position is located at the Pennsylvania Department of Transportation Traffic Management Center in Allentown, PA. TMC Operations Technicians assist with the coordination and implementation of Traffic Incident Management and congestion management strategies using various Intelligent Transportation System (ITS) technologies including:

- Closed-Circuit Television Cameras
- Dynamic Message Signs
- Roadway Incident Detectors
- Advanced Transportation Management System (ATMS) software

Other responsibilities include monitoring, collecting, coordination, and transmission of traffic control information and data to and from other traffic control centers, the media, PennDOT maintenance crews, Emergency Operations Centers, and other related agencies. Operators will also dispatch and communicate with Expressway Service Patrol vehicles on regional state roadways.

A background in transportation, emergency services and/or emergency dispatch is preferred, but not required. On-site training will be provided.

Please note that there is not a regular schedule with this position. As an "on-call" operator, available hours will vary in both amount and frequency based on the staffing needs of the Traffic Management Center. Candidates applying for this position should have a flexible schedule and be available on short notice if necessary.

Requirements

Candidates should possess excellent communication skills, computer literacy, and be able to perform multiple tasks simultaneously in a fast-paced environment.

Pay

\$18.00 per hour

Please send resumes to [Allie Slizofski, PE, PTOE](#).
