

## TRANSPORTATION PLANNER or ENGINEER

### **Location**

Harrisburg, PA (headquarters in Blue Bell, PA)

### **Job Type**

Full time (40 hours/week); PTO and benefits

### **Job Description**

Drive Engineering is seeking a highly self-motivated candidate with 3 to 6 years' experience in the Oil and Gas Industry for an on-site office assignment related to the roadway impacts caused by Marcellus Shale and other drilling/heavy user activity.

Candidates should have a thorough understanding of Oil and Gas activities as it related to transportation engineering. Including the following: hauling, utilizing posted and bonded roadways, roadway maintenance and PennDOT's policies and procedures.

Assignment would begin immediately with one year duration with opportunity for more progressive assignments.

### **Requirements**

- BS or MS Degree in engineering, planning, or a related field.
- Excellent oral and written communication and time management skills.
- Experience with GIS and Microsoft Office Suite. CAD design software a plus.
- Knowledge and experience with PennDOT standards and permitting is strongly preferred.

### **About Drive**

Drive Engineering is a leading DBE/MBE provider of Transportation Planning and Engineering consulting services in the Mid-Atlantic region. Our staff is experienced in all project aspects from the early planning stages to project completion. We have planning, design, review, and construction inspection experience in large scale Transportation, Intelligent Transportation Systems (ITS), and Traffic Signal deployments. Key clients include PennDOT, the Pennsylvania Turnpike Commission, other DOTs and municipalities from Virginia to New York, and several local and national engineering firms.

As a growing firm, Drive Engineering is committed to investing in the professional development of our staff. The position is an opportunity to be in a cutting-edge field within an expanding company.
